

ICM in NZ

- Recent survey (2007) based on IWM Canada
- Definitions, issues, indicators, activities
- Telephone interviews – mgmt down
- Q's - ours and IWM survey (Canada)

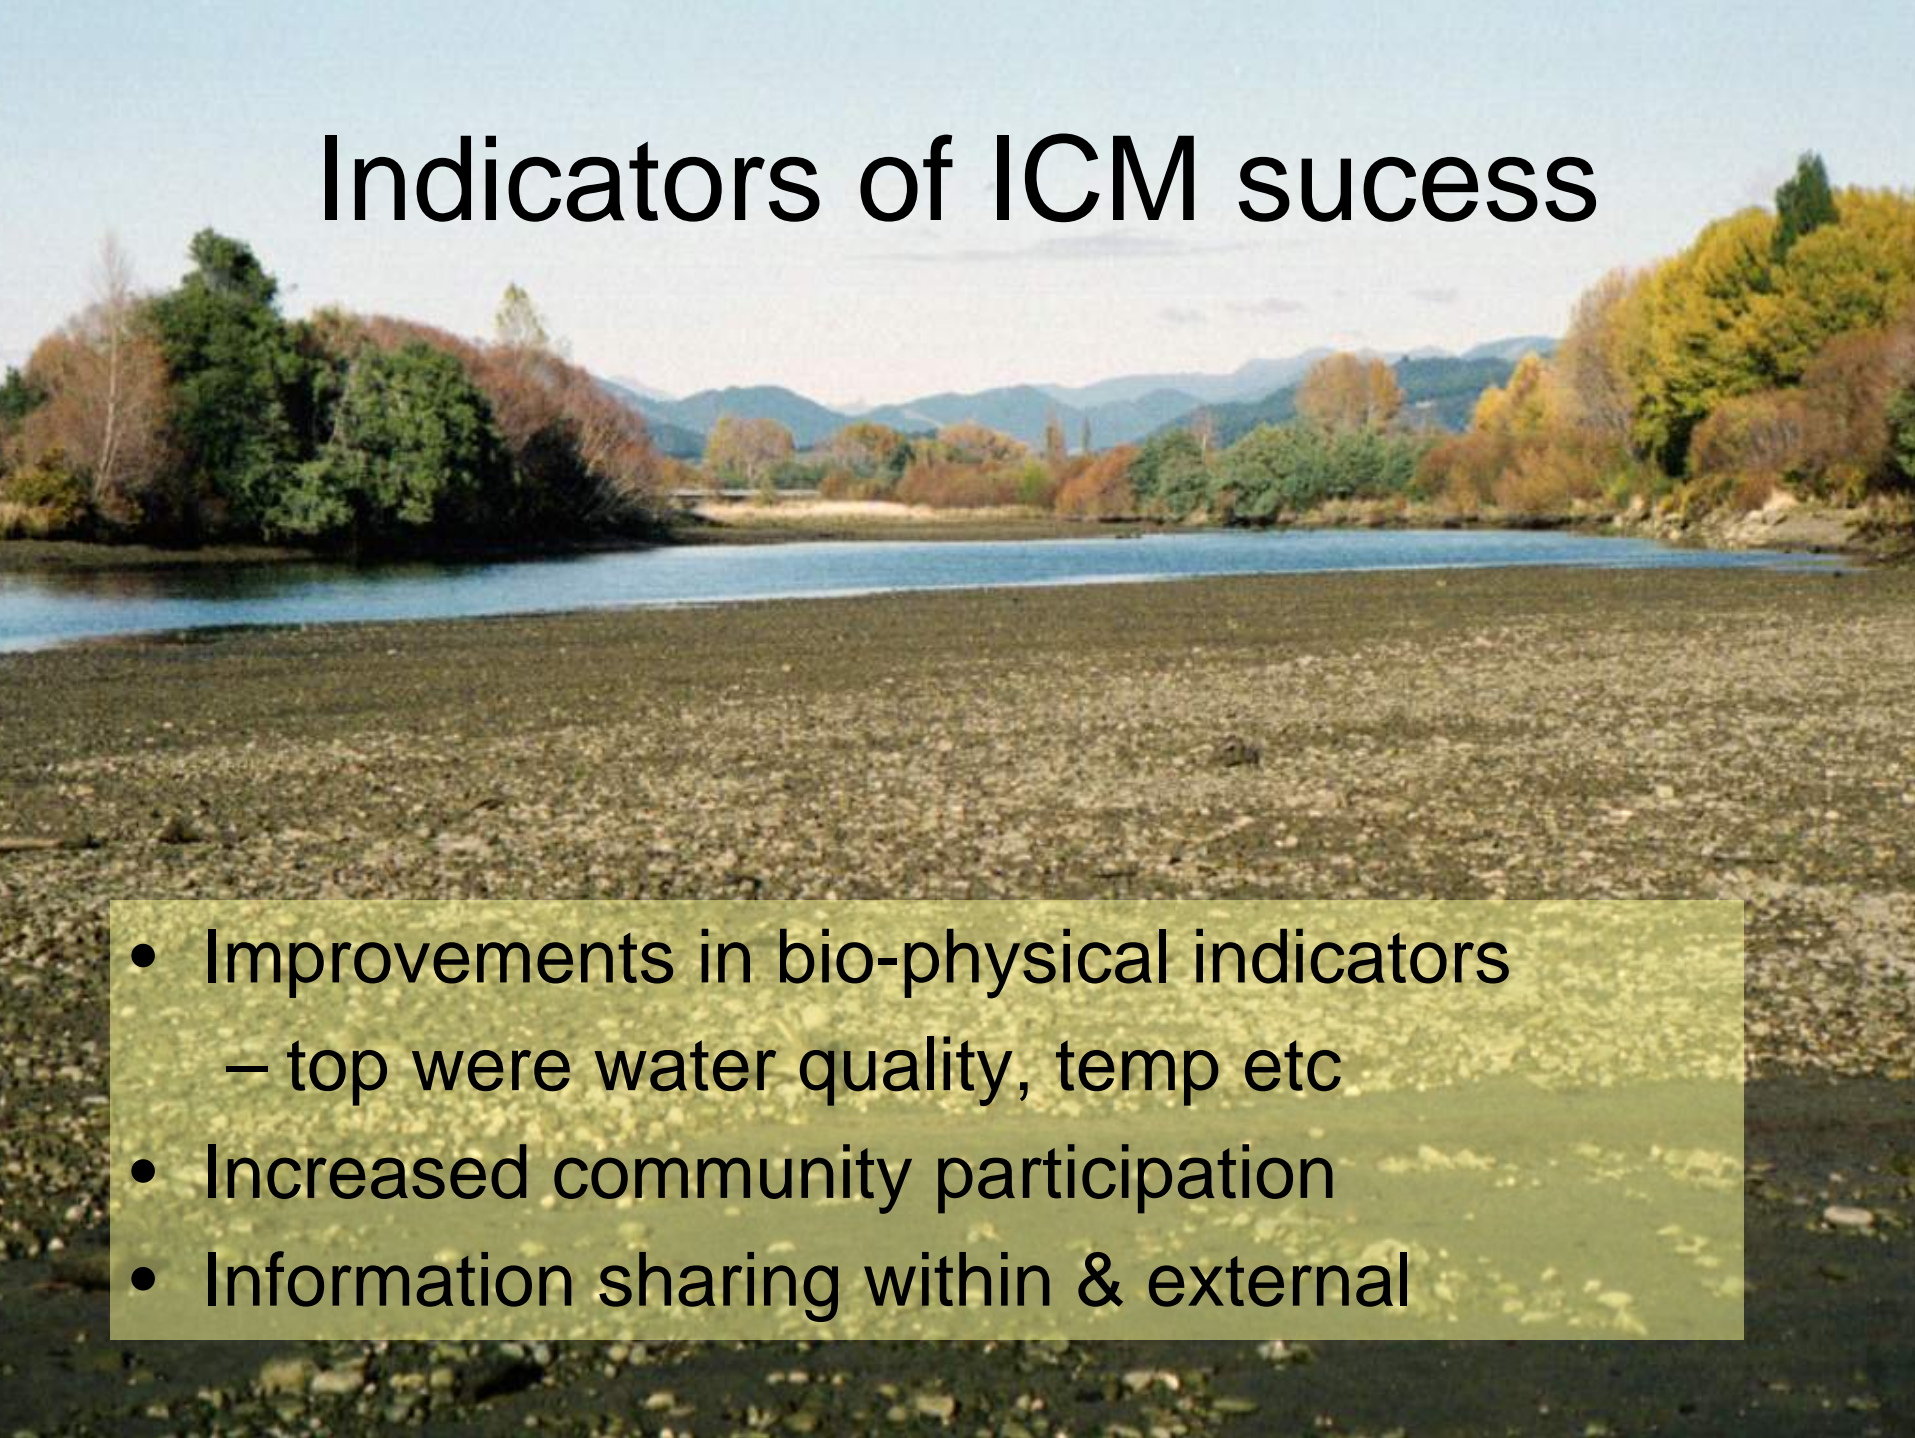

Interview results – what is ICM?

- 
- Defn – holistic mgmt
 - Wide terminology
 - Focus on water issues - sometimes land
 - Partnership with community & govt integral
 - Management on long-term basis

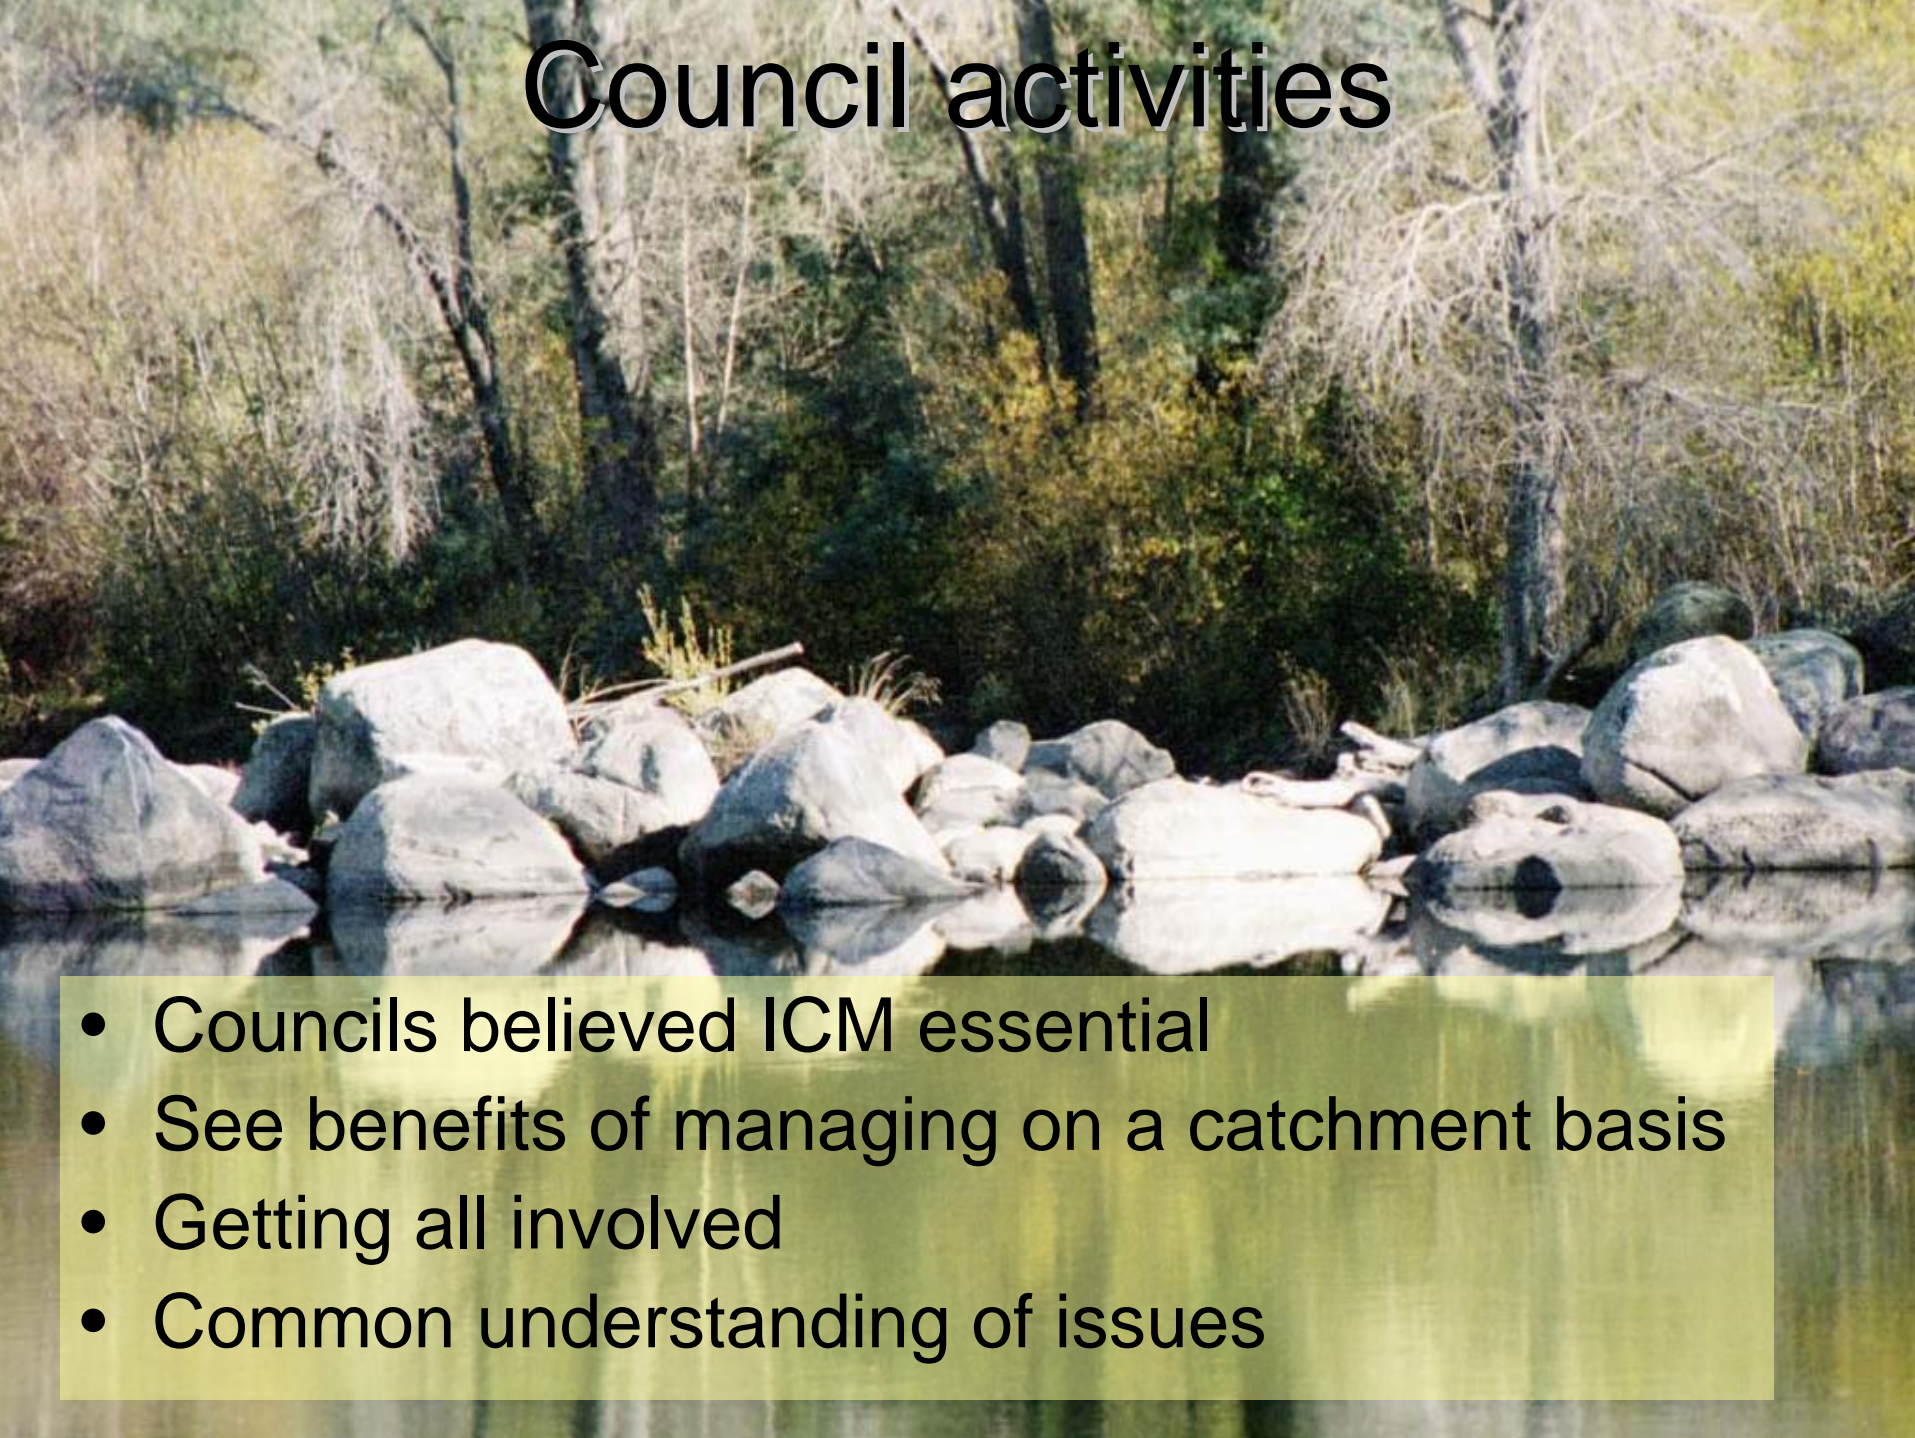

Main ICM issues in NZ

- Managing land to improve water quality
- Water quality and allocation demands
- Biosecurity & integ pest control into mgmt plans
- Community concerns about water
- Managing nutrient enriched water ways, etc

Indicators of ICM success

- 
- Improvements in bio-physical indicators
 - top were water quality, temp etc
 - Increased community participation
 - Information sharing within & external

Council activities

- 
- Councils believed ICM essential
 - See benefits of managing on a catchment basis
 - Getting all involved
 - Common understanding of issues

How are councils implementing ICM?

- 
- Various methods
 - Coordinating multiple issues & activities
 - Focusing on land issues to improve WQ2
 - Major focus dealing with public concerns
 - Using pilot catchments

Who is taking the ICM lead?

- Most said were responsible – mandated
- Half thought others were driving ICM
- Waitaki, Living streams, Waikato hydro lakes, CNI Lakes, cities (urban ICM), etc
- Various levels of ICM'ness

Who is doing ICM?.

- Whole range of people within councils
- Some just starting ICM progs
- Public engagement usually extensive
- ICM underpinned by LGA and RMA
- Big focus on getting community 'Buy-in'

ICM evolution

- ICM not a new concept – catchment boards
- SOE and community interest driving ICM
- Happening all over NZ to varying degrees
- Means different things to different people

The surest way to add value to a network is to connect it to another network.

Michael Schrage

Challenges for ICM

- Funding
- Scale
- Many other challenges
- Engaging the community/landowners
- Leadership burnout
- Balance
- More research
